CURESEARCH
FOR CHILDREN'S CANCER

OUR MISSION

Our mission is to end childhood cancer by driving targeted and innovative research with measurable results in an accelerated time frame. With our cutting-edge research strategy and industry-leading resources, CureSearch is leading the field in driving and delivering results so that all children diagnosed with cancer have safe and effective treatment options.

Every dollar raised helps us drive next-generation research with the greatest impact on the children, adolescents, and young adults who are depending on us.

Cancer is the #1 disease killer in children. 42 children are diagnosed with cancer every day in the US alone.

We only fund research with the strongest potential to become a new treatment and quickly reach patients.

Our funded pre-clinical projects are 7x more likely to advance to clinical trials compared to the national average.

OUR RESEARCH STRATEGY

For more than 35 years, CureSearch has been a driving force in children's cancer research. Recognizing a broken system, growing obstacles and unmet need in pediatric cancer drug development, we've launched an innovative and unique strategy to address the urgent, critical need for new childhood cancer treatments. CureSearch-funded pre-clinical projects are 7x more likely to advance to clinical trials and get there 1.5x faster compared to the national average.

60% of pre-clinical research projects funded through our Acceleration Initiative advance to clinical trials, compared to a less than 8% average rate of translation for drugs into clinical cancer trials.

At CureSearch, we're uniquely positioned to drive critical stakeholder collaborations to accelerate the pace of pediatric drug development. With the support of best-in-class Scientific and Industry Advisory Councils, we only fund research projects with the strongest potential to become a new treatment and quickly reach patients.

Our translational, pre-clinical and clinical stage awards give preference to areas of high unmet need — the cancers with the lowest survival rates, fewest, or most damaging treatment options, and populations that are under-served, including adolescents and young adults.

2022 DONOR HONOR ROLL

We fund translational research, including pre-clinical and early phase clinical trials, and that wouldn't be possible without support from our generous donors. Thank you to our donors who have made gifts of \$5,000 or more.
