LETTER FROM THE CEO

At CureSearch for Children’s Cancer, we work tirelessly to find better treatments and cures for the children who need them most. Working closely with patients, researchers, partners and industry leaders, we convene the key players to help further our mission to end children’s cancer. In 2017, we made significant strides and we are thrilled to share our most significant advancements with our passionate supporters.

The outcomes of our efforts—from the annual Catapult Summit held in March to the 30 new drugs in pre-clinical testing—continue to reverberate throughout the pediatric cancer research field. Our impact is not only measured by the results of our research projects, but also by the resources we provide to the many communities and patient families we serve. In 2017, we brought together patients, families and supporters at 80 events in 26 states across 63 different cities and provided critical resources such as our free CancerCare app, webinars and educational videos.

We couldn’t do this without you. Together, with support from our generous donors, corporate partners and event participants, we drive forward our collective goal of creating a world where children with cancer can lead long and healthy lives. Thank you for your support and dedication.

Sincerely,

Kay Koehler
CEO, CureSearch for Children’s Cancer
CURESEARCH MISSION

Our mission is to end children’s cancer by driving targeted and innovative research with measurable results in an accelerated time frame.

RESEARCH VISION

Improve children’s cancer treatment and cures to deliver the potential for childhood cancer patients to lead long, healthy lives.

OUR THREE PILLARS

RESEARCH

By rigorously vetting and driving high-potential pediatric research at all stages of drug development, CureSearch is leading the development of better, less-toxic children’s cancer treatments.

NEUTRAL CONVENER

Armed with world-class advisory councils, we are breaking down the barriers and convening the right players across the industry to focus on our shared goal: saving kids NOW.

RESOURCES

We provide children and families with the tools and resources they need to battle cancer today, while advancing new and better treatments to protect their futures. This includes our free CancerCare app, webinars and informational videos.
More than 100,000 compounds screened for potential to treat pediatric tumors

3 new therapies nearing clinical trial for high-risk gliomas

1 novel-cell therapy to reduce treatment-related toxicity in acute myeloid leukemia

1 revolutionary stress management protocol developed for children and adolescents with cancer and their families

30 new drugs in pre-clinical testing for high-risk brain cancer, sarcoma, leukemia and Wilms tumor

300+ potential new drug targets being studied for 9 types of children’s cancer
Our research strategy accelerates better, less-toxic children’s cancer treatments to young patients faster. To ensure the greatest chance of success, we support researchers through funding, guidance, knowledge and relationships to help them navigate the regulatory environment and clinical trials network.
$2.4 million over five years (2013-2017)

The CureSearch Young Investigator program addresses the loss of promising scientists from the pediatric oncology field by providing financial support to early-stage investigators. CureSearch awarded six Young Investigator grants in 2015. Investigators were highly productive during their three years of funding, making great strides towards finding new treatments and supporting the emotional well-being of kids with cancer.

ACCELERATION INITIATIVE

Developed in 2013, the Acceleration Initiative is a $10 million investment in the most innovative translational children’s cancer research. Acceleration Initiative investigators address the areas of greatest challenge in children’s cancer research as defined by the most respected thought leaders in the field today.

CURESEARCH RESEARCH STRATEGY RESULTS
2015–2018

Dr. Gilbertson and his team are determining novel and repurposed treatment options for three high-risk brain tumor subtypes. Advancements include:

- 8 new patient-derived pre-clinical animal models developed for medulloblastoma
- 1 novel high-risk ependymoma animal model created
- 3 compounds in pre-clinical testing
- 1 innovative multimodality pre-clinical trial design that more accurately recapitulates complete human treatment regimens in animal models
- 1 clinical trial initiated based on pre-clinical data provided by the Gilbertson lab

Richard Gilbertson, MD, PhD
University of Cambridge

Targeted Therapies for High-Risk Brain Tumors
Awarded $834,000 over three years for the project
Dr. Roncarolo and her team are establishing a novel cell therapy to reduce the toxic effects of standard acute myeloid leukemia (AML) treatment. Advancements include:

- 1 novel cell line validated for cell therapy
- 40 pediatric AML samples utilized for pre-clinical testing
- 2 novel myeloid cell lines created
- 4 cell surface markers identified that correlate with cell killing
- 1 novel *in vivo* imaging method to monitor anti-leukemic activity
Dr. Kung and his team are using analytical analysis of sequencing data to identify targetable vulnerabilities in high-risk pediatric sarcomas, including rhabdomyosarcoma, Ewing sarcoma and osteosarcoma. Advancements include:

- 155 unique pediatric sarcoma cases collected for characterization of master regulators
- 78 patient-derived xenograft models generated to test treatments
- 33 novel cell models developed for pre-clinical drug screens
- 3 new drugs in pre-clinical testing based on genetic drivers of pediatric sarcomas
The second annual Catapult Summit was hosted on February 26–27, 2017, at the Quadrus Center in Menlo Park, California. The invitational gathering convened leading researchers, investors, advocates and pharmaceutical and biotech executives who are committed to accelerating pediatric cancer treatments.

Our uniquely curated agenda combined stimulating keynote presentations with panel debates and interactive workshops to facilitate open discussions, idea sharing and relationship building.

The annual CureSearch Catapult Summit serves as a unique platform for fostering collaboration across traditionally fragmented sectors. Attendees share a singular goal: to create a world where children with cancer can lead long, healthy lives.
Thank you to our 2017 Catapult Summit sponsors. Their generous support helps us drive forward our collective goal of creating a world where children with cancer can lead long and healthy lives.
Launched in 2015, the CureSearch Community Impact Awards (CCIA) recognize community-based programs that aim to address the immediate needs of childhood cancer patients. In 2017, CureSearch awarded grants to hospitals and clinics with projects that provide caregiver resources and psycho-social support for children with cancer and their families. By the end of 2017, CureSearch had supported 31 projects at hospitals across the United States, totaling more than $600,000.

The 2017 CCIA grants supported community hospital programs in one of the following areas:

- Pediatric patient and family counseling services
- Development of patient and parent support groups
- Healing arts for pediatric oncology patients
- Translation of educational materials for pediatric patients and families

SUPPORTING FAMILIES

No family should face a cancer diagnosis without a fully equipped team behind them. CureSearch continued its commitment as an authoritative source for education and resources in 2017 by offering:

**FUNDRAISING EVENTS**
- 16 CureSearch Superheroes Unite Events
- 6 Ultimate Hikes
- 58 Gold Ribbon Events
- 63 cities in 26 states

**CURESEARCH WEBSITE**
- Sessions: 1,013,132
- Unique visitors: 807,612
- Pageviews: 1,816,106

**INTERACTIVE RESOURCES**
- Webinars for schools, caregivers and families
- CancerCare, our free cancer diagnosis management mobile app for families and caregivers

**EDUCATIONAL MATERIALS**
- Online content on coping with cancer
- Children’s cancer facts and figures
- Ella Dolls for children affected by cancer

In 2017, our free CancerCare app was downloaded more than 11,000 times!
2017 DONOR HONOR ROLL

CureSearch is grateful for every gift received. We would like to especially acknowledge these donors:

**$100,000 and above**
- Genentech Foundation
- Jacob Koenigs ‘Jakefest’ Memorial Fund and Kiewit
- Mathile Family Foundation
- Novartis Pharmaceuticals Corporation

**$50,000-$99,999**
- Acerta Pharma
- Anonymous
- Paula and Michael Carter—The Scott Carter Foundation
- Shark Shootout Charities

**$25,000-$49,999**

- Nick Currey Legacy Fund
- Shark Shootout Charities
- Amgen, Inc.

LEGACY AND CHAMPION FUND DONORS
CureSearch offers Legacy Funds, a special way for families to honor their child’s memory and continue the fight against pediatric cancer. Champion Funds recognize children currently in treatment or who are now in remission.

- Nick Currey Fund
- Luke McGuire Legacy Fund
- Jacob Koenigs “Jakefest” Memorial Fund
- Amy Miller Champion Fund
- Eloise Dodge Gould Legacy Fund
- Sheri Sobrato
The CureSearch CUREsaders are monthly donors who provide ongoing support to fund novel and innovative cancer research with automated monthly or quarterly gifts.
